SUMMARY

Final-year Information Systems Engineering student (UTN, expected Dec 2027) with nearly three years of industry experience building clean and scalable systems. I evolved from full-stack engineering into designing applied AI solutions and workflow automations: multi-agent systems, RAG pipelines, tool calling and context control. Beyond writing code, I bring product sense and strategic thinking to build systems that drive business value, plus proven experience leading technical courses and workshops. NASA Space Apps 2024 national winner.

EXPERIENCE

AI Engineer — RepuestoShop Dec 2025 – Present · Remote

- Architect and deploy multi-agent systems and custom RAG pipelines with LangChain and LangGraph, focused on agent harness engineering, tool calling and context control.
- Designed a multi-agent assistant (LangGraph) with RAG over scraped catalog data to answer customer questions.
- Build internal tools with Meta APIs and web scraping pipelines for data grounding.
- Benchmark LLM providers for the best cost/quality trade-off in production, and use Codex and Claude Code to research unfamiliar tech and deliver production-ready POCs fast.

Freelance Full-Stack Developer — La Vista Casal Nov 2025 – Aug 2026 · Buenos Aires

- Co-built a tax-deadline management platform for an accounting firm: approval flows, change history and Google Calendar/Gmail integration. Running in production.
- Delivered full handover: technical report, executive summary and user guide.

Instructor, Process Automation with n8n — Poder Judicial de Tucumán Sep 2025 – Oct 2025

- Designed and delivered a 20-hour practical course on workflow automation with n8n for court staff, with original materials and live build sessions on API/webhook integrations, RAG pipelines and Human-in-the-Loop workflows.
- Presented the automation strategy to the Judiciary's leadership.

Product Engineer — RollingCode Studio Oct 2024 – Dec 2025

- Built frontend and backend features for client web projects; introduced n8n automations and explored practical AI tools through working POCs.
- Automated internal tasks with n8n; worked in Scrum teams with Git Flow and code review.

Full-Stack Developer (Volunteer) — Fundación Líderes de Ansenuza Apr 2025 – Present

- Leading the foundation's digital transformation: rebuilt its web platform (Next.js, Prisma, PostgreSQL) and internal tools.

Teaching Assistant, Web & Backend — RollingCode School Nov 2023 – Aug 2024

- Mentored students in web and backend development.

TECH STACK

AI & agents	LangChain, LangGraph, multi-agent systems, RAG, tool calling, context control, LLM APIs (OpenAI, Anthropic, Gemini)
Automation	n8n, APIs and webhooks, Human-in-the-Loop workflows
Data grounding	Web scraping pipelines, Meta APIs, Google Workspace APIs
Languages	TypeScript, JavaScript, Python, SQL
Web & Cloud	React, Next.js, Node.js, Express, PostgreSQL, MongoDB, Supabase, AWS, Vercel
Tooling & practices	Codex, Claude Code, Git, Git Flow, CI/CD, Scrum

PROJECTS & AWARDS

NASA Space Apps 2024 — National Winner

ExoGames, national winning project (Buenos Aires hackathon, virtual). National competitor again in 2025.

Proofy — Solana hackathon, 2026

Web app with an AI agent that turns a contract's scope into verifiable milestones and releases escrow payments on CI/CD evidence. proofyai.vercel.app

Vortex Software n8n Hackathon 2025

On-site competitor in Tucumán.

EDUCATION

B.S. Information Systems Engineering — Universidad Tecnológica Nacional (UTN-FRT)

Feb 2022 – Dec 2027 (expected)

CERTIFICATIONS

Full-Stack Developer (MERN) — Outstanding Student · RollingCode School · Nov 2022 – Sep 2023

Advanced React · RollingCode School · May 2024 – Sep 2024

Advanced Next.js · RollingCode School · Jun 2025 – Nov 2025

Data Engineer · RollingCode School · Jun 2025 – Oct 2025

LANGUAGES

Spanish (native) · English (fluent) · Russian (basic)
