Francisco Miguel Perez

Backend Developer | Node.js, TypeScript, Python | REST APIs, PostgreSQL, MongoDB, AWS

Tucumán, Argentina (GMT-3) · On-site, hybrid or remote

franciscoperezdeveloper@gmail.com linkedin.com/in/franprzdev github.com/franprzdev me-pink-ten.vercel.app

SUMMARY

Backend-focused software developer with 3 years building production systems: REST APIs and services in Node.js and Python, data modeling in PostgreSQL and MongoDB, integrations with third-party APIs and webhooks, and deployments on AWS and Vercel. I also work on the frontend (React, Next.js) when the product needs it, and add AI and automation where they solve a real problem (LLM agents, RAG, n8n). Comfortable working directly with clients and non-technical users, from gathering requirements to handover and training. NASA Space Apps 2024 national winner. Final-year Information Systems Engineering student at UTN (expected Dec 2027).

TECH STACK

Languages	TypeScript, JavaScript, Python, SQL
Backend	Node.js, Express, REST APIs, webhooks, authentication, background jobs
Frontend	React, Next.js
Databases & Cloud	PostgreSQL, MongoDB, Supabase, AWS, Vercel, Netlify
Integrations & Automation	n8n, Google Workspace APIs, Meta APIs, web scraping
AI	LLM APIs (OpenAI, Anthropic, Gemini), LangChain, LangGraph, RAG
Practices	Git, Git Flow, code review, CI/CD, Scrum, clean code

EXPERIENCE

Software / AI Engineer — RepuestoShop Dec 2025 – Present · Remote

- Build and maintain internal tools and customer-facing automation for an auto-parts e-commerce, integrating Meta APIs and the product catalog.
- Designed a multi-agent assistant (LangGraph) with RAG over scraped catalog data to answer customer questions.
- Compared several LLM providers to choose the best cost/quality trade-off for production.

Freelance Full-Stack Developer — La Vista Casal Nov 2025 – Aug 2026 · Buenos Aires

- Co-built a tax-deadline management platform for an accounting firm: approval flows, change history and Google Calendar/Gmail integration. Running in production.
- Delivered full handover: technical report, executive summary and user guide.

Product Engineer — RollingCode Studio Oct 2024 – Dec 2025

- Built backend features and APIs in Node.js for client web projects, plus the matching React/Next.js frontends.
- Automated internal tasks with n8n; worked in Scrum teams with Git Flow and code review.

Full-Stack Developer (Volunteer) — Fundación Líderes de Ansenuza Apr 2025 – Present

- Leading the foundation's digital transformation: rebuilt its web platform (Next.js, Prisma, PostgreSQL) and internal tools.

Instructor, Process Automation with n8n — Poder Judicial de Tucumán Sep 2025 – Oct 2025

- Designed and taught a 20-hour course on n8n, APIs and automation workflows for court staff; presented the automation strategy to leadership.

Teaching Assistant, Web & Backend — RollingCode School Nov 2023 – Aug 2024

- Mentored students in web and backend development.

PROJECTS & AWARDS

NASA Space Apps 2024 — National Winner

ExoGames, national winning project (Buenos Aires hackathon, virtual). National competitor again in 2025.

Proofy — Solana hackathon, 2026

Web app with an AI agent that turns a contract's scope into verifiable milestones and releases escrow payments on CI/CD evidence. proofyai.vercel.app

Vortex Software n8n Hackathon 2025

On-site competitor in Tucumán.

EDUCATION

B.S. Information Systems Engineering — Universidad Tecnológica Nacional (UTN-FRT)

Feb 2022 – Dec 2027 (expected)

CERTIFICATIONS

Full-Stack Developer (MERN) — Outstanding Student · RollingCode School · Nov 2022 – Sep 2023

Advanced React · RollingCode School · May 2024 – Sep 2024

Advanced Next.js · RollingCode School · Jun 2025 – Nov 2025

LANGUAGES

Spanish (native) · English (fluent) · Russian (basic)
