SUMMARY

Software developer with 3 years building production web applications end to end: frontends in React and Next.js, APIs in Node.js and Python, databases, deployments and third-party integrations. I add AI and automation where they solve a real problem (LLM agents, RAG, n8n) and work directly with clients, from requirements to handover. NASA Space Apps 2024 national winner.

TECH STACK

Languages	TypeScript, JavaScript, Python, SQL
Frontend	React, Next.js, HTML/CSS, Tailwind
Backend	Node.js, Express, REST APIs, webhooks
Databases & Cloud	PostgreSQL, MongoDB, Supabase, AWS, Vercel, Netlify
AI & Integrations	LLM APIs (OpenAI, Anthropic, Gemini), LangChain, LangGraph, RAG, n8n, Google Workspace APIs, Meta APIs
Practices	Git, Git Flow, code review, CI/CD, Scrum, clean code

EXPERIENCE

Software / AI Engineer — RepuestoShop Dec 2025 – Present · Remote

- Build and maintain internal tools and customer-facing automation for an auto-parts e-commerce, integrating Meta APIs and the product catalog.
- Designed a multi-agent assistant (LangGraph) with RAG over scraped catalog data to answer customer questions.

Full-Stack & Automation Developer — Freelance Projects Nov 2025 – Aug 2026

- Co-built a tax-deadline management platform for an accounting firm: approval flows, change history and Google Calendar/Gmail integration. Running in production.

Product Engineer — RollingCode Studio Oct 2024 – Dec 2025

- Shipped frontend and backend features for client web projects in React, Next.js and Node.js.

Full-Stack Developer (Volunteer) — Fundación Líderes de Ansenuza Apr 2025 – Present

- Leading the foundation's digital transformation: rebuilt its web platform (Next.js, Prisma, PostgreSQL) and internal tools.

Instructor, Process Automation with n8n — Poder Judicial de Tucumán Sep 2025 – Oct 2025

- Designed and taught a 20-hour course on n8n, APIs and automation workflows for court staff; presented the automation strategy to leadership.

PROJECTS & AWARDS

NASA Space Apps 2024 — National Winner: ExoGames, national winning project (Buenos Aires hackathon, virtual). National competitor again in 2025.

Proofy — Solana hackathon, 2026: Web app with an AI agent that turns a contract's scope into verifiable milestones and releases escrow payments on CI/CD evidence. proofyai.vercel.app

EDUCATION

B.S. Information Systems Engineering — Universidad Tecnológica Nacional (UTN-FRT)

Feb 2022 – Dec 2027 (expected)

LANGUAGES

Spanish (native) · English (fluent) · Russian (basic)

CERTIFICATIONS

Full-Stack Developer (MERN) — Outstanding Student · RollingCode School · Nov 2022 – Sep 2023 · **Advanced React** · RollingCode School · May 2024 – Sep 2024 · **Advanced Next.js** · RollingCode School · Jun 2025 – Nov 2025
