SUMMARY

Full-stack software engineer with almost four years of experience building and shipping web products end to end with React, Next.js, Node.js and PostgreSQL, plus applied AI integrations: LangGraph agents, RAG and n8n automation. Information Systems Engineering student (UTN-FRT, degree in progress). NASA Space Apps 2024 national winner.

EXPERIENCE

AI Engineer - RepuestoShop | Remote · Dec 2025 - Oct 2026
- Built the whole system end to end, from the moment a lead arrives to the end of their interaction: the AI agent layer and a CRM built from scratch.
- Designed and deployed a multi-agent assistant (LangGraph) with tool calling and retrieval over scraped catalog data via SQL full-text search to answer customer questions.
- Built internal tools and automations for other parts of the business, integrating Meta APIs and scraping pipelines that feed the agents with data.
- Worked to understand the product and what its customers needed, and took it to them: from a lead's first message to the end of the interaction. Compared LLM providers on cost and quality to choose what runs in production.

Product Engineer - RollingCode Studio | Oct 2024 - Dec 2025
- Built frontend and backend features for client web products (React, Next.js, Node.js); automated internal tasks with n8n; Scrum, Git Flow and code review.
- Automated, with the team, a bureaucratic procedure that took about a year; it now takes under a month. Another certificate process went from one month to one week.

Instructor, Automation and AI with n8n - Poder Judicial de Tucumán | Sep - Oct 2025
- Designed and taught a 10-class, 20-hour course on process automation with n8n for Judiciary staff: workflow modeling, APIs, webhooks and local LLMs.

Full-Stack Developer (Volunteer) - Fundación Líderes de Ansenuza | Apr 2025 - Present
- Lead the digitalization of the foundation: website, online presence and internal management tools (Next.js).

Teaching Assistant, Web & Backend - RollingCode School | Nov 2023 - Aug 2024

PROJECTS & AWARDS

- **ScopeProfit** (2026) - MCP tools that let an AI agent turn what a client asks for into a versioned scope document, with cited requirements, risks and estimated hours, exportable to PDF/Word. Born from the BNB Builder Session Tucumán (Oct 2026, participant). scopeprofit.vercel.app
- **NASA Space Apps** - 2024: national winner (ExoGames). 2025: participant, with the project BeeAgro.
- **Proofy** (Solana hackathon 2026, prototype) - AI agent that turns a contract scope into verifiable milestones and releases escrow payments based on CI/CD evidence.
- **Reelsmith** (2026) - MCP server in Rust that lets an AI assistant render short promo videos from gameplay clips, with automatic QA (loudness, black frames).
- **Vortex Software n8n Hackathon 2025** - competitor (Tucumán).

EDUCATION & CERTIFICATIONS

B.S. Information Systems Engineering, UTN-FRT (Degree in progress)
RollingCode School: Full-Stack MERN (Outstanding Student, 2022-2023) · Advanced React (2024) · Advanced Next.js (2025) · Data Engineer (2025)
OpenAI Academy: Agents and Workflows (Sep 2026) · Applied AI Foundations (Aug 2026) · AI Foundations (Aug 2026)
Google: AI Essentials (Oct 2025) · Prompting Essentials (Oct 2025)
Languages: Spanish (native) · English (B1) · Russian (A1)

TECH STACK

Languages: TypeScript, JavaScript, Python, SQL · **Frontend:** React, Next.js, Tailwind · **Backend:** Node.js, Express, REST, webhooks · **Data/Cloud:** PostgreSQL, MongoDB, Supabase, AWS, Vercel, Netlify · **AI:** LangGraph, multi-agent systems, MCP (Model Context Protocol) servers, tool calling / function calling, RAG, LLM APIs (OpenAI, Anthropic, Gemini) · **Automation:** n8n, Google Workspace APIs, Meta APIs · **Practices:** Git, Git Flow, CI/CD, Scrum, code review
Also: Vector search / embeddings (working knowledge) · SQL · ISO 9001 and ISO 27001 (university coursework) · Cybersecurity (university coursework) · Data analytics · Logical thinking
